

Introduction to Curriculum Development and Instructional Design

Anjala V. Tess, MD

Hospitalist

Associate Residency Program Director

Assistant Professor in Medicine

Department of Medicine

Beth Israel Deaconess Medical Center

Harvard Medical School, Boston, MA

atess@bidmc.harvard.edu

Objectives

- Describe key elements in curricular design and implementation
- Utilize one framework of curricular design to begin planning a quality and safety curriculum
- Explain the difference between assessment and evaluation
- Develop an initial evaluation plan utilizing the Kirkpatrick paradigm

What is curriculum?

Any planned educational experience

Six “Steps” of Curriculum Development

1. General Needs Assessment
2. Targeted Needs Assessment
3. Goals and Objectives
4. Educational Strategies
5. Implementation
6. Evaluation and Feedback

Kern, et al

Curriculum Template (modified)

- Goals and Resources
- Core Content -> Objectives
- Selecting Teaching Strategies
- Selecting Assessment Tools
- Evaluation
- Implementation

Case

- Dr. Taylor has been teaching at an academic medical center for two years and works with the patient safety office.
- Based on their recent CLER visit review, each program has been asked to train their residents on how to report errors.
- The Residency Program Director asks if Dr. Taylor would be willing to design a mini-curriculum on error reporting for her residents.

Case (cont.)

- The end of year program survey shows that only half of residents report understanding how and where to report adverse events.
- Dr. Taylor knows from her work in the patient safety office that residents seem uncomfortable participating in RCAs. She believes much of the fear comes from not understanding what happens to the report or how root cause analyses are conducted.
- Culture of safety data suggest that residents do not understand their role in the overall safety process.

Case (cont.)

- There are currently 30 residents in the program.
- The program director is willing to give Dr. Taylor two hours from the residents' protected time for curriculum. This time can be used for lectures or workshops.

Basic question

- Who
- What
- Why
- Role???

Curriculum Template (modified)

- Goals and Resources
- Core Content -> Objectives
- Selecting Teaching Strategies
- Implementation
- Selecting Assessment Tools
- Evaluation

Goals

- Delineate overall purpose of the curriculum
- Short, descriptive
- Focus on the teaching program or experience
- Communication tool

Gathering Resources

- People
 - Stakeholders
 - Content experts
 - Teachers
- Time
 - Learner time
- Money
 - Why?
 - Where?

Goals and Resources: Key Points

- Understand your goal and the rationale behind it.
- Have a clear sense of your resources up front.

WHY?

Building a Core Content

- Core concepts or skills you want to teach
- Sources
 - Needs assessment
 - Other published curricula
 - Content experts
- Domains
 - Knowledge, Skill, and Attitudes

Core Content for Dr. Taylor

- Definitions – adverse events and near misses
- Incident reporting system at the hospital
 - How and where to report
 - What happens to the report and investigation
- How to do a root cause analysis
- Value their role in error reporting

Core Content for Dr. Taylor

- Knowledge
 - Definitions – adverse events and near misses
 - Incident reporting system: what happens to the report and investigation
- Skills
 - How to do a root cause analysis
 - Incident reporting system: how to enter a report
- Attitude
 - Value their role in error reporting

Objectives

- Specific, measurable, and performance-based learning objectives
- Focus on the learner
- Not descriptive
- Communication tool

“Residents will be able to...”

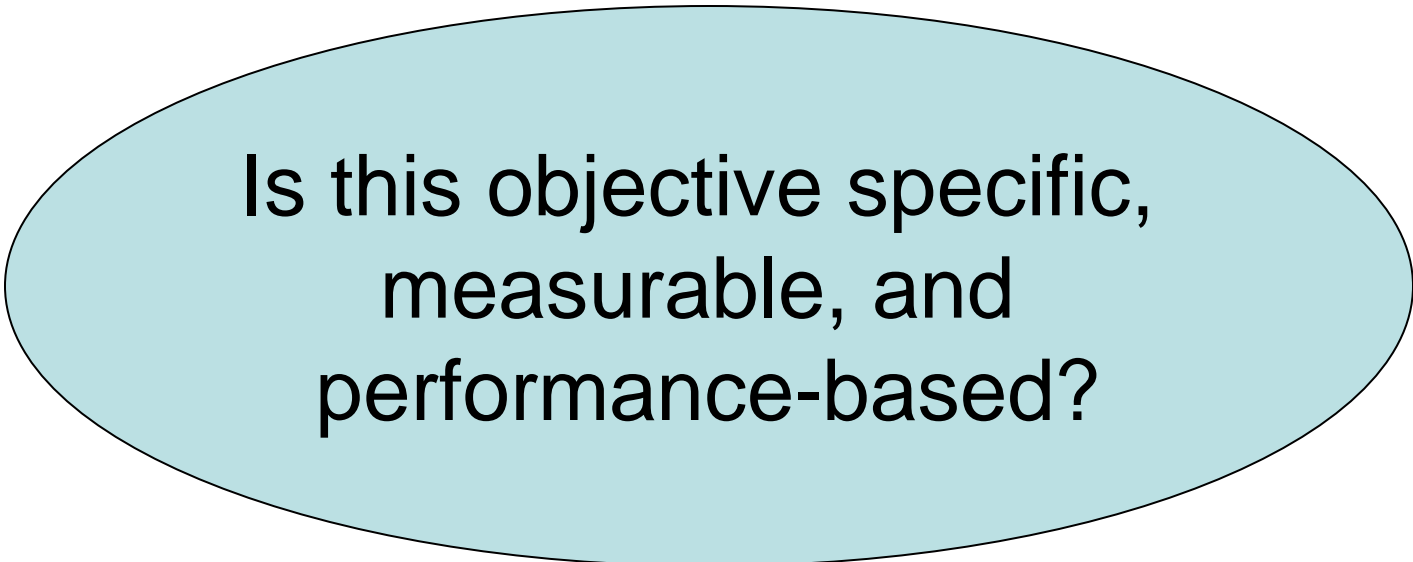

Content → Objective

Knowledge

Adverse Events →

Learning Objective

Understand what an adverse event is

Is this objective specific,
measurable, and
performance-based?

Content → Objective

Skill

Root Cause Analysis

Learning Objective

Perform an RCA

Which objective
is specific,
measurable, and
performance-based?

Know how to do an
RCA

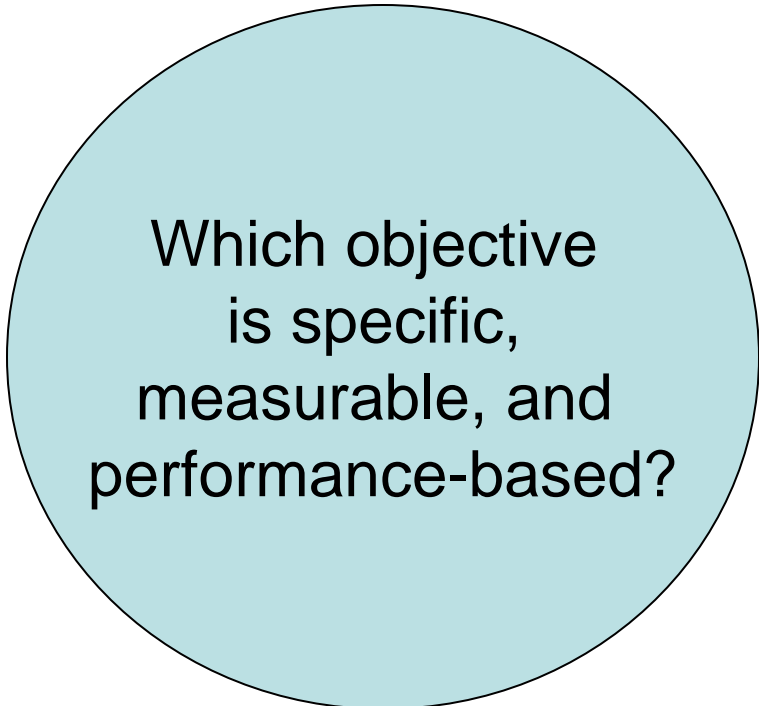

Content → Objective

Attitude

Value their role in error reporting →

Learning Objective

Incorporate error reporting into their routine practice

Which objective
is specific,
measurable, and
performance-based?

Rate error reporting as an important part of their jobs as front line providers

Active verbs

Words that are less specific	Words that are more definitive	
Know Understand	List Recite Sort Distinguish Define Repeat Identify	Describe Give example of Write Solve Compare Contrast Name
Know how Internalize	Demonstrate Incorporate into behavior Practice Illustrate Perform	
Appreciate Believe Learn Teach Enjoy	Rate as valuable or significant Rank Identify or rate as belief	

Bloom' s Taxonomy

- Knowledge: rote memorization, recognition, or recall of facts
- Comprehension: understanding what the facts mean
- Application: correct use of the facts, rules, or ideas
- Analysis: breaking down information into component parts
- Synthesis: combination of facts, ideas, or information to make a new whole
- Evaluation: judging or forming an opinion about the information or situation

Bloom's Verbs

Bloom's Levels of Cognition	Verbs
Knowledge	list, recite, define, name, match, quote, recall, identify, label
Application	calculate, predict, apply, solve, illustrate, use, demonstrate
Comprehension	describe, explain, paraphrase, restate, summarize, interpret, discuss
Analysis	classify, outline, break down, categorize, analyze, diagram, illustrate
Synthesis	design, formulate, build, invent, create, compose, generate, derive, modify, develop
Evaluation:	determine, defend, judge, grade, compare, contrast, argue, justify, support, convince, select, evaluate

Writing Objectives - FAQs

- How do I know whether a content area goes in knowledge and skill?
- How specific do we need to get?

Content → Objective: Key Point

- Don't let the perfect become the enemy of the good.
(Less is sometimes more)
- Writing clear objectives is much harder than it looks but is the most important step.

A yellow oval with a black outline, containing the text "WHY?" in black, bold, uppercase letters. The oval is positioned in the lower right quadrant of the slide.

WHY?

Key Point

Selecting Teaching Strategies

- Match strategy to content domains to create teaching plan.
- Multiple settings for different types of learners

Selecting Teaching Strategies

- Knowledge
 - Readings
 - Audiovisual aids
 - Case with discussion
 - Lectures
- Skills
 - Simulated
 - Standardized patient
 - Models
 - Role play
 - Clinical experience with feedback
- Attitudes
 - Exposure
 - Openness
 - Role modeling
 - Discussion

Table top exercise

Writing objectives

Selecting teaching strategies

Objective → Teaching Strategy

Knowledge

Objective → Teaching Strategy

Skills

Objective → Teaching Strategy

Attitude

Teaching Strategies: Key Point

- Revisit your resources before you move onto assessment.
- Combine teaching strategies to preserve resources.

Curriculum Template (modified)

- Goals and Resources
- Core Content -> Objectives
- Selecting Teaching Strategies
- Selecting Assessment Tools
- Evaluation
- Implementation

Assessment and Evaluation

Karyn Baum, MD, MSEd
Hospitalist

Associate Chair of Clinical Improvement

Professor of Medicine

University of Minnesota

kbaum@umn.edu

Teaching and Learning: Definitions

“The goal of education, if we are to survive, is the facilitation of change and learning”

-Carl Rogers, 1969

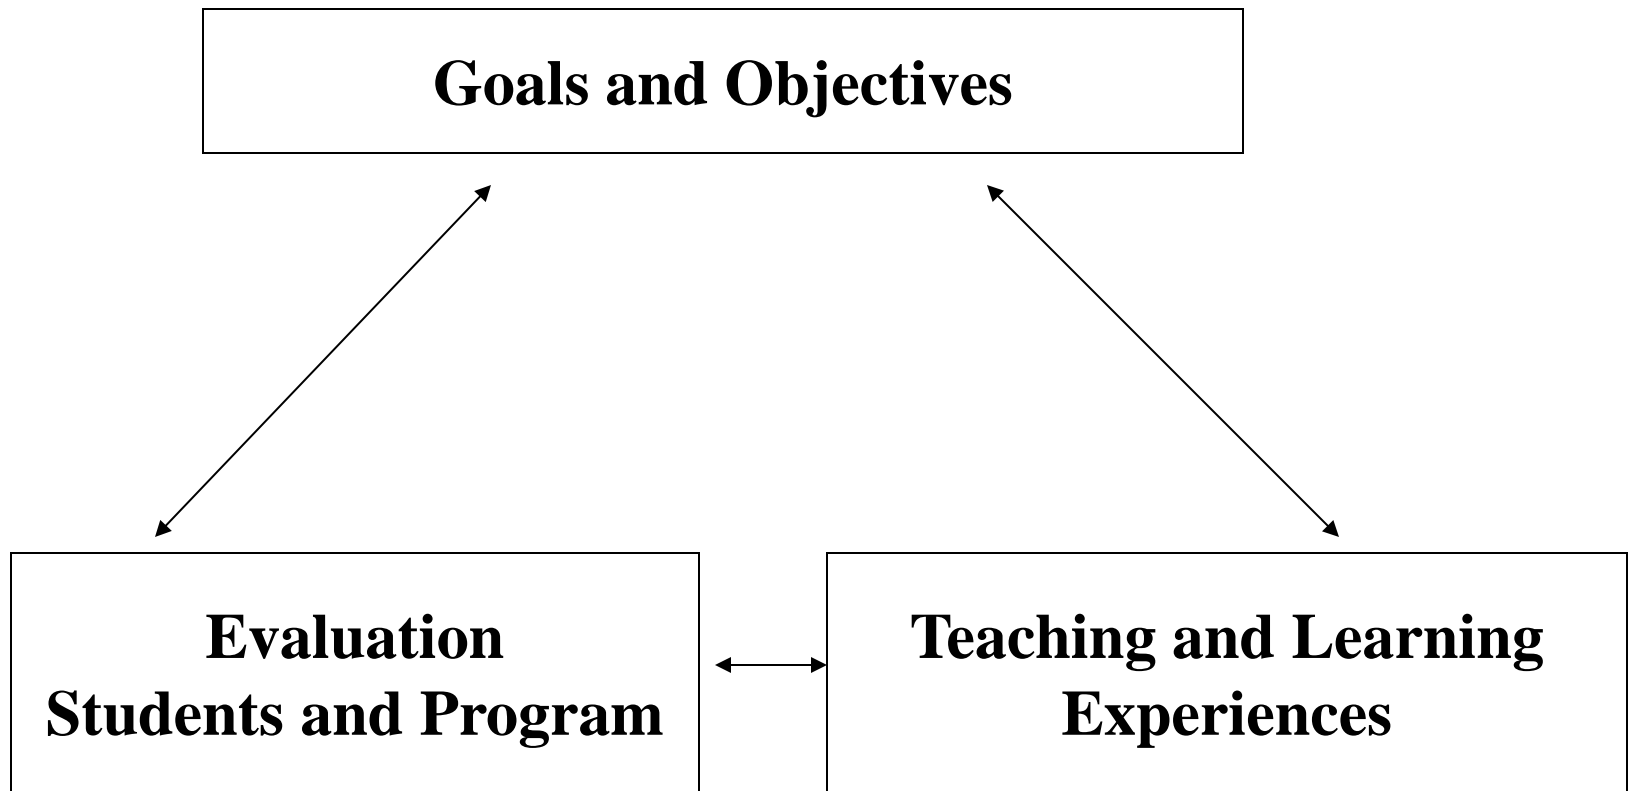

Objectives

- Describe key elements in curricular design and implementation
- Utilize one framework of curricular design to begin planning a quality and safety curriculum
- Explain the difference between assessment and evaluation
- Develop an initial evaluation plan utilizing the Kirkpatrick paradigm

Education Program Design and Lesson Planning

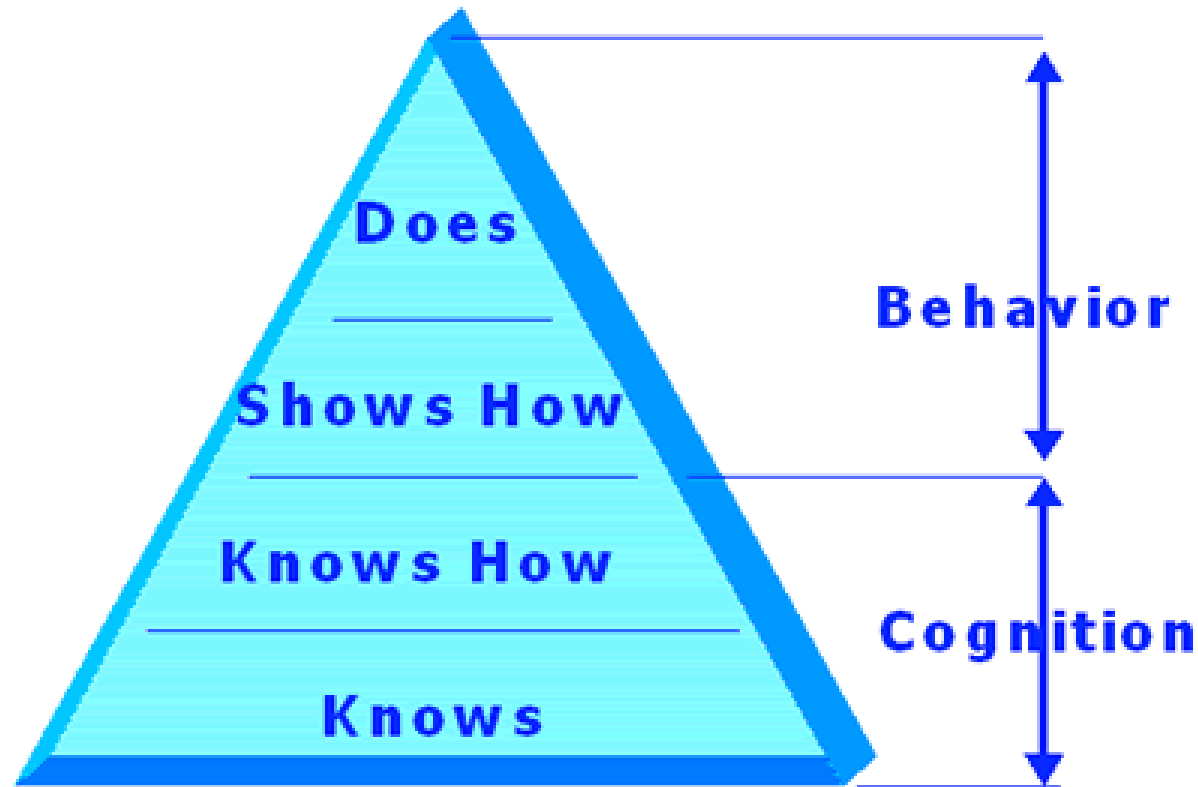

Basic questions to answer

- What difference have we made?
- What is the effect upon learners?
- Did our program work, and why (or why not)?
- Was the “juice worth the squeeze”—did the benefit and change exceed the “costs” of the activity?

Learner Assessment

Miller's Pyramid

Assessment of Learner Performance

- Knows: MCQs, essay, short answer, oral exam
- Knows how: oral exam, demonstrates
- Shows how: OSCEs, simulation, standardized settings
- Does: How learners function in real world

Milestones

- Use these to help plan assessments
- Give you a behavior-based tool to reach towards
- Be consistent to the level of learner

Exercise

- Spend 10 minutes at your tables designing measurement tools for the curriculum you designed
 - At least 2 levels of the triangle
 - Do you have current tools you can share with tablemates?

Where Miller's Model Stops

- Learner satisfaction and perceptions
- Effect upon patients and outcomes
- Cost versus quality (ROI)
 - Value-based education?

Program evaluation

- Remember WHY you are evaluating
 - Improve
 - Document
 - Study
- Did the overall program work?
 - What were its effects?
- Kirkpatrick's is a useful paradigm

Kirkpatrick's Model of Training Evaluation

- Kirkpatrick, D. L. (1994). *Evaluating Training Programs*. San Francisco: Berrett-Koehler Publishers, Inc.

Kirkpatrick's Model of Training Evaluation

- Kirkpatrick, D. L. (1994). *Evaluating Training Programs*. San Francisco: Berrett-Koehler Publishers, Inc.

Reactions

- “Likes”
- Most commonly measured aspect of program evaluation
 - Survey post-education

Learning

- See Miller' s
- Knowledge, Skills, Attitudes
- How do you measure in QI?
 - QIKAT
 - Examples of other validated tools here?

Transfer

- Do they take this to the workplace?
 - Dr. Taylor's curriculum: do the resident now engage in RCAs properly? Use the incident reporting system?
- Methods to measure:
 - Self-report
 - Observations

Results

- Where the rubber hits the road
- Outcomes, outcomes, outcomes
 - Include balancing measures to assure no harm
- Consider ROI (Value)

Exercise

- Which levels (beyond learning) should you evaluate for this new curriculum?
- How will you do this?
- 15 minutes at your tables

Curriculum Template (modified)

- Goals and Resources
- Core Content -> Objectives
- Selecting Teaching Strategies
- Selecting Assessment Tools
- Evaluation
- Implementation

Implementation

- Pilot as you go!
 - Teaching strategies
 - Evaluation tools
- Leave time for faculty development
- Leave time for evaluation in the session itself

Pearls and Pitfalls

- Including educational and institutional leadership in the planning will help in design, implementation and maintenance of your program.
- Choosing multiple venues will allow you to capture different learning styles.
- Remember that strategies that are most effective at teaching skills are often the most resource intensive – choose wisely.
- Even large group, didactic-type conferences can be ideal venues for role modeling and changing attitudes!
- Housestaff are the most valuable teachers.

Pearls and Pitfalls

- Don't save assessment and evaluation for the night before
- Use already-developed tools whenever possible
- Starting small and evaluating a pilot program can bring rich results and satisfy many core objectives.

Thank you!
